

# THINK SAFE – DON'T GIVE VIRUSES A CHANCE

**Anything that is passed from hand to hand is a potential carrier of germs, such as bacteria, viruses or fungi.**

Germs can be found on surfaces of all kinds, and printed products are no exception. Packaging, banknotes, playing cards: when passed from person to person, they are all potential carriers of germs, some of which present a serious threat to human health.

Some bacteria are astonishingly resilient, capable of surviving for several days on the surfaces of dry paper or board. They are therefore able to travel from the packaging, via the hands, to the mouth or eyes. With its antimicrobial action, the special coating on Meto dispenser boxes is able to reduce the transmission of germs.

The photocatalysis process employs no additional chemicals, making it one of the most sustainable and environmentally safe technologies.

## METO LABELS IN GERM-FREE DISPENSER BOXES

### ✓ Swift and efficient due to photocatalysis process

Kills up to 99.5% of germs merely by exposure to daylight or artificial light, and oxygen. No additional action needed.

### ✓ Broad range of action

Against germs, parasites, bacteria, viruses and fungi.

### ✓ Highly effective

Even against germs with multiple drug resistance.

### ✓ Continuously germ-free

On our dispenser boxes, the effect is continuous and sustained for at least a year.

### ✓ Free of harmful substances

The coating is colourless and non-toxic.

### ✓ Laboratory-tested

Tested by several independent test institutes in accordance with ISO 22196 (mod.).

# ORIGINAL METO VIRUS-FREE LABELS

## ORIGINAL METO VIRUS-FREE LABELS

### ✓ Continuously virus-free

Application of a special coating makes the labels virus-free. The effect is continuous and lasts for at least a year.

### ✓ Tamper-proof

Our tamper-evident labels feature security slits on the front. These tear when the label is removed and prevent it from being reapplied.

### ✓ Strong advertising appeal

Ideal for eye-catching and effective advertising labelling. Pre-printed or with your own choice of design.

### ✓ Labels are supplied in a practical dispenser box with sterilizing function

Protected against dirt and dust during storage, but with quick and easy dispensing and application.

### ✓ Reliable adhesion

Advanced technology ensures that the labels adhere quickly and firmly.

### ✓ Custom text

Text can be applied either by hand or by means of a thermal transfer printer from the Metro PrintHybrid range.

### ✓ Sustainable

Meto labels are PEFC-certified and contain no latex, bisphenol, heavy metals or ozone-depleting substances. The adhesive is solvent-free.

## APPLICATIONS

### ✓ Food to Go

Perfect for delivered restaurant meals, takeaways, kerbside collection, catering, food delivery services and food parcels.

### ✓ Tamper-evident seal

Ideal for sealing pizza boxes, paper bags, cups, beverage lids, and a wide variety of food containers.

### ✓ Tamper-proof

Perfect for protection against tampering and for use as guarantee seals or tamper-evident.

### ✓ Promotion

Put your good name on good food.
